

ETX-1000

A compact, economic and reliable automatic applicator for self-adhesive labels. Available in several versions providing maximum label widths of 80, 140 and 200 mm. Three versions of electronic control allow maximum product speeds of up to 20, 30 or 40 M/min.

A range of accessories includes: transparent label sensors, balancing terminals, pneumatic applicators, product JIG's for semi-automatic applications, floor stands with or without linear adjustment...

ETX-2000

Available in two versions with web widths of 140 and 200 mm. The labelling speed is adjustable up to 50 m/min and thanks to a reliable stepper motor & electronic microchip control, this ensures high-precision labelling. The ETX-2000 range is completed with a high performance unit, maximum label width 140 mm and dispensing speed up to 70 M/min. This version allows labels roll Dia up to 400mm with Low-Label alarm & motorized rewind for backing paper.

An operator interface with digital display and function keys, gives quick retrieval of label formats making product change very easy!

A complete range of accessories, pneumatic applicators, hot-foil units and stands are available to customise for your needs!...
